

## The Purpose Compass™

### What is The Purpose Compass™

Just as the Compass has North, South, East, West directional points, we also need directional points to navigate successfully on our life journey. The Purpose Compass™ is a tool we believe will help anyone discover a systematic way of unlocking their purpose that is at the center of our personal beliefs, passions, gifts and talents.

<b>Beliefs</b>	Self-Discovery Question:  What do you at the core level believe about yourself, life and others?
<b>Passions</b>	Self-Discovery Question:  What do you desire, what energizes you or creates anger for you to want to change for yourself and others?
<b>Gifts</b>	Self-Discovery Question:  What can you do that is natural, easy but maybe hard for others?
<b>Talents</b>	Self-Discovery Question:  What skill have you learned, studied or trained over time?

The Purpose Compass is a tool that will help anyone who desires to systematically discover the purpose they believe they are placed on earth to fulfill. This tool is inspired by the teaching and years of studies of Dr. Myles Monroe and many other mentors. This tool was also created from a place of questioning my own purpose in life.

According to Dr. Myles Monroe, Personal Leadership is the key to personal success. He believed all people including You are a leader on the inside. He stated that our leadership is rooted in managing and stewarding our personal gifts for godly influence. Dr. Myles Monroe states leaders have strong visions that they see through their belief system aka mindset. So I decided to develop a guiding tool for questioning and examining experiences in my own life.

So after completing this exercise for myself, I found my answers to be true for me. We pray for you and that this tool helps guide you through thoughtful life questioning and inner soul dialogue for answers you already have on the inside.
