Discover Scuba Diving

What does the experience consist of ?

1 MINI THEORY CLASS

A theory class of about 45 minutes where the basic physics of diving, safety regulations, the use of equipment and underwater communication are explained. In addition, an explanation of the area in which you dive and the fauna that we can observe while we do the dive is made.

- = OK
- = NOT ok
- = UP = DOWN

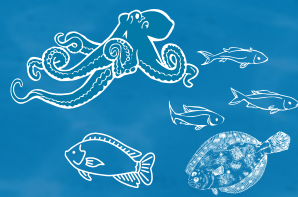

2 FIRST UNDERWATER SENSATIONS

A practical part at a shallow depth where the most important thing is that each participant manages to relax and enjoy the sensations of breathing underwater. This part does not have a specific time, it will depend on the needs of each participant.

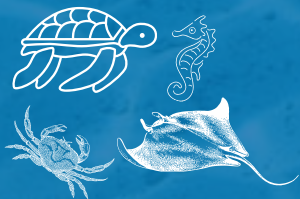

3 THE GUIDED DIVE

A guided dive to enjoy marine life and the sensation of swimming under the surface. This dive is about 50 minutes long and you are under the supervision of our instructors at all times.

4 DIVE SUMMARY

After the dive we get out of the water and a few minutes are dedicated to commenting on the marine life that was observed and the sensations of the participants.

In our dives it is common to see many marine species such as flounder, salemas, octopus and cuttlefish, rays, greenfish, spider crabs, garden eels, barracudas, parrotfish and many more! We will send you videos and photos of the experience for free.
