

MEDIVIEW PCR/MIH/CP

documentation and

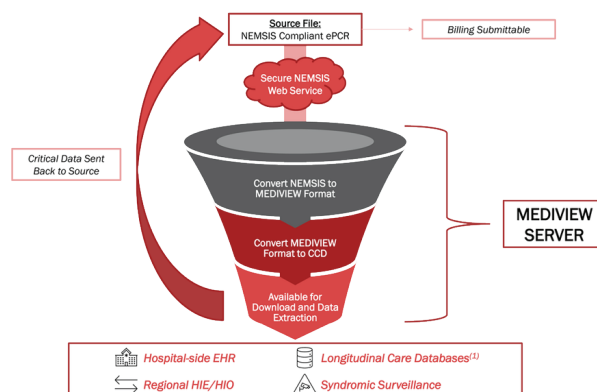

PCR AMB/WC/MIH/CP DOCUMENTATION

- Windows, iOS & Android. ePCRs as fast as 5 MINUTES. Target documentation time reduction: 60% from baseline. Works offline.
- Customizable surveys, PCR Templates, and validation rules.
- Customizable formulary, procedures...even graphical screens.
- QA/CQI process enables secure two-way dialogue with crews.
- Over a billion combinations of analytic reports and filters.
- HIPAA, SAMHSA & 42 CFR Part 2 compliant for use in CP/MIH-type programs focused on substance abuse and mental health.
- Share data, using consumable HL7 CDA formats, with a receiving ED in 30 seconds, even prior to patient arrival.
- Regional analytics – including PHI – for use by CP/MIH-type programs on behalf of patients who are exhibiting chronic care, mental / behavioral, or substance use disorders.
- Manage patient engagements based on their needs – for example, if a particular practitioner has to be assigned due to:
 - Language requirements
 - Religious restrictions (e.g., person can only be cared for by someone of _____ faith) – or cannot see anyone on the Sabbath, etc.
 - Gender preferences (maybe a patient is only comfortable with a woman taking care of her specific healthcare needs, etc.)
 - Other demographic or psychographic needs.

- Track ACTION ITEMS, which are directly related to demonstrating non-clinical steps taken on behalf of the patient, and feed into the economics
- Integrated speech-to-text for narrative creation
- Import Social Determinants data into any chart
- Available Integrations: Health Information Exchange, Billing, CAD, Fire, ECGs / Medical Devices, Handtevy, Inventory, Pulsara.
- Use mobile device camera to scan driver's licenses;

FEE STRUCTURE

- Multiple Models including - Per Encounter/PCR/Chart, Per Patient Per Month, Program Census Based
- Annual Fee from HIE for membership at the appropriate level for full longitudinal tracking, Demographics, payor and medical history.
