Dear Sir/Madam,

worked on a variety of projects in my studying period and job career as a web, mobile, standalone applications [for 1st / 2nd-year projects and assignments and **MIS ERP Lanka(PVT) Ltd** web/mobile applications] and have been recognized on several occasions for coming up with creative solutions during my career.

I focused on the development of web/mobile applications using the latest and cutting edge technologies such as PHP, Android, Java... etc. I gained the practical knowledge of web/mobile technologies, **ERP Process of Accounting System**, software development processes including agile, incremental builds in my university career as well as a job career.

I am constantly on a lookout for opportunities where I can upgrade my skills and learn new technologies.

Thanks,

Sincerely.

UDITH PERERA

SOFTWARE ENGINEER
