

BMW CONNECTED DRIVE. GET STARTED GUIDE. ICONIC SOUNDS SPORT.

ICONIC SOUNDS SPORT YOUR BMW. YOUR ICONIC SOUND.

IconicSounds Sport stages engine sound via the audio system inside to match the driving dynamic. With IconicSounds Sport your ultimate driving experience is enhanced in every driving mode. Inside the vehicle, you can hear the engine sound that matches the current driving dynamics. You can also individually adjust the intensity of the experience.

Select the desired mode using the Driving Dynamics Control and the IconicSounds Sport feature will pick out the perfect engine sound to match the driving mode.

You can also use the "Engine sound" setting to configure the intensity of the sound independently of the Driving Dynamics Control. To do this Select "Car" > "Settings" > "General Settings" > "Engine Settings" > "Engine Sound". Then select the desired setting.

At the time of this writing, IconicSounds Sport is available on most MY 2020 and newer X5, X6, and X7 vehicles, with vehicle software level 20-03 and newer as well as selected MY2021 and newer 5 Series vehicles. Additionally, this feature is not applicable on vehicles with factory option 1MA (M Sport exhaust system). To confirm whether this is available on your vehicle, visit the ConnectedDrive store at <https://www.bmwusa.com/mybmwconnecteddrive>.
