

Local Operating Procedure (LOP)

SEA – Ground Handling	Melissa Motley - GM	
Version – 2.1	Date – 07/26/2024	Page - 1

Local Operating Procedures Packet:

The following are required local procedure documentation, to be developed according to local specifics and implemented in the station. LOPs must be available to all employees in addition to all other company publications. Local procedures should be reviewed annually, or upon a relevant change of process, customer, references, etc. Station management is responsible for the maintenance of this document, and all LOPs.

LOP - GSE OUT OF SERVICE PROCEDURES

It is a requirement for the ramp/warehouse to create local procedures for reporting, locking and tagging out of service ground support equipment. The process must ensure that unserviceable equipment does not return to service until the deficiency is corrected.

Describe the following when GSE becomes unserviceable:

- What are the steps taken and who to notify of equipment that is not serviceable?
- How is GSE rendered immobile (Locked Out)?
- Where are the tags and who is responsible for tagging the equipment out of service?
- Who can return the GSE to service?

1. Notify a supervisor
2. Red tag if necessary (red tags in gate bags)
3. Turn red tag tab into maintenance
4. Supervisor reports on ECR
5. In case of an emergency, contact MX immediately
6. Only MX can remove a red tag and return equipment to service

LOP - CUSTOMER RECORDKEEPING

It is a requirement for the warehouse, ramp or passenger service to create a local procedure for record keeping which defines what records are kept, for what carrier and 1) where they are kept, 2) who has access, 3) the retention/destruction schedule, 4) how they are kept safe/secure

Customer or Air Carrier	Records Kept	Location of Records	Access/Safe/Secure	Retention/Destruction
BA	Flight folder	BA Office	Load planner/ admin / management	30 days
ALL	Scale calibration	On Scale/POS	POS/All staff	30 days
ALL	ECR	Z Drive – Main office	Leadership/ Admin/ management	30days

<i>SEA – Ground Handling</i>	<i>Melissa Motley - GM</i>	
<i>Version – 2.1</i>	<i>Date – 07/26/2024</i>	<i>Page - 12</i>

LOP - SCALE CALIBRATION

<p>It is a requirement for the cargo, express or ticket counter locations (if scales are maintained by WFS) to identify, by scale, the calibration requirements, who the authorized vendor is and where to report issues. Also note if scales are checked daily and the local steps. If scales are owned by the air carrier or airport operator, please identify that in the Remarks.</p>		
Scale Number or Identification	Location	Calibration Requirements / Checks /Timeframe / Remarks
Common Use	At all common use ticket counters	POS calibrates scales annually and places certification sticker on the scale
<p>Who is the scale repair/calibration vendor and their contact information? Washington State Department of Agriculture Weights and Measures Program 360-902-1857 wtsmeasures@agr.wa.gov</p>

LOP – OVERSIZE LUGGAGE SCREENING

It is a requirement for passenger handling locations (both ticket counter and ramp handling) to identify specific processes to process oversize luggage that cannot transit a baggage handling system. This process must assure that any luggage being process outside of the normal process is screened by the TSA in an acceptable manner.

Describe the following steps which must be taken when any customer luggage cannot transit the baggage handling system which ensures proper screening is completed:

- Where will luggage be picked up that won't fit in the system?
- Where will luggage be taken for TSA screening?
- How will the carrier know that the luggage has been properly screened?
- How do we ensure that unscreened luggage is not loaded onto an aircraft?
- How is the process documented?

POS/TSA SOP requires that inbound luggage that won't fit into the system, will be taken to the IAF and CBP will be alerted that it needs to be screened.

- After the luggage is cleared by the CBP, they let the carrier representative know it is clear for delivery. The carrier advises the luggage is clear for delivery and the luggage is taken to the double doors.
- Outbound luggage that will not fit into the system will require a call to the TSA. The TSA will screen the luggage at the counter. Once the luggage is clear, it will be sent to the double doors.
 - The TSA will stamp the bag tag verifying it has been checked.
 - The Carrier does not give clearance to move the baggage to the double doors until they have received the go ahead from the TSA and the item has been stamped. TSA stamp and carrier instruction.

POS/TSA SOP.
