#### **Local Operating Procedures Packet:**

The following are required local procedure documentation, to be developed according to local specifics and implemented in the station. LOPs must be available to all employees in addition to all other company publications.

Local procedures should be reviewed annually, or upon a relevant change of process, customer, references, etc. Station management is responsible for the maintenance of this document and all LOPs.

#### **LOP - GSE OUT OF SERVICE PROCEDURES**

It is a requirement for the ramp/warehouse to create local procedures for reporting, locking and tagging out of service ground support equipment. The process must ensure that unserviceable equipment does not return to service until the deficiency is corrected.

Describe the following when GSE becomes unserviceable:

- What are the steps taken and who to notify of equipment that is not serviceable?
- How is GSE rendered immobile (Locked Out)?
- Where are the tags and who is responsible for tagging the equipment out of service?
- Who can return the GSE to service?

| SEA – Express Amazon 166B<br>(WH1) & 156A (WH2) | Tim Logan - GM    |          |
|---|-------------------|----------|
| Version – 2.1                                   | Date - 08/07/2024 | Page - 9 |

WFS
Worldwide Flight Services

Procedural Reference

Author: K. Roberts
Dept: Training/Quality

Issue Date: 03/01/2021
Retention: UFN

Equipment must be RED TAGGED by any employee noticing defects with equipment

#### THE PROCESS:

- Red-Tag is completed and attached to the steering wheel
  - o highly visible place for non-motorized equipment (dolly tongue, handle, etc.)
- · Contact Duty Manager/Supervisor to check equipment to confirm red-tag status
  - o provide location and vehicle number
- . Duty Manger/Supervisor to ensure Red-Tagged unit is included on daily ECR and provided to GSE
- If Red Tagged equipment is impacting operational performance, a PHONE CALL must be made to GSE at ###-###-#### (Local GSE Number)
- . If the equipment is safe to drive, it should be taken to (insert local designated staging area here)

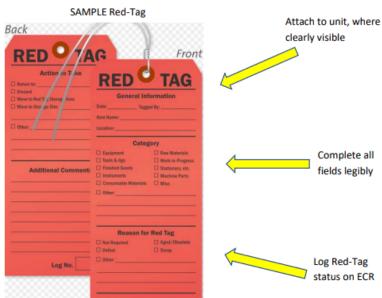

Equipment should only be <u>pulled</u> by other GSE equipment <u>NEVER PUSHED</u>.

Equipment must only be pulled by means of rope or chain found in the (insert location of rope/chain here). Pulling of equipment should only be performed by Supervisors, Duty Managers or GSE staff.

If it is not possible to pull the equipment due to its location, a GSE mechanic must move or supervise the movement of the GSE.

#### When to Red Tag

- Unsafe to operate
- Leaking fluids
- Not operating normally
- Flat/Worn Tires
- If it is questionable, red tag it!

| SEA – Express Amazon 166B<br>(WH1) & 156A (WH2) | Tim Logan - GM    |           |
|---|-------------------|-----------|

#### **LOP - SCALE CALIBRATION**

It is a requirement for the cargo, express or ticket counter locations (if scales are maintained by WFS) to identify, by scale, the calibration requirements, who the authorized vendor is and where to report issues. Also note if scales are checked daily and the local steps. If scales are owned by the air carrier or airport operator, please identify that in the Remarks.

| Scale Number or Identification | Location   | Calibration Requirements / Checks /Timeframe / Remarks |
|--------------------------------|--|--|
