

# Strong, beautiful shape.

A new tableware created by combining advanced and traditional technology.

We abandoned the conventional ideas and reconsidered all the materials, technologies, and shapes from scratch.

We have developed a new material that combines glass and resin so that it can be used for a longer time.

With the skills of Japanese craftsman we made it possible to realize designs which were thought to be too difficult to produce in the past. environmentally friendly and enrich our lives. We create environmentally friendly products that enrich our lives.
