

THINK. MODEL. LEARN.™ MATH CENTERS: FRACTION ADDITION ACTIVITY GUIDE

PRODUCT INCLUDES:

Activity Guide

Storage Box

Instruction Tent

Activity Mats

Fraction Pieces

Game Pawns

Spinners

PURPOSE:

Empower children to independently practice fraction addition! This center is standards aligned for grades 4-5 and geared for skill differentiation – it is double-sided for practice on two skill levels: adding fractions with common denominators and adding fractions with unlike denominators. Students build an understanding of fractions as they work to build a whole. This hands-on, engaging center is sure to make skill-building fun as students think, model, and learn!

SET UP:

Each activity mat will accommodate two students. Three activity mats are provided for up to six students total.

1. Choose the skill level the student will be working on and flip the mat to the appropriate side.
2. Provide two pawns for each student. Also provide the corresponding spinner for each pair of students to share.
3. Provide each student with a pack of fraction pieces.

We recommend explaining instructions to students before independent play. Place the tent where students can see it for instruction reminders and visuals during use.

HOW TO USE:

Step 1:

Each player: start with both of your pawns on your gear. Take turns spinning the spinner. To move a pawn onto the mat, you must land on Enter Pawn. If you land on Enter Pawn, spin again to move on the mat. If you have no pawns to enter, end your turn.

Step 2:

Continue taking turns spinning the spinner and moving on the mat. Use your fraction pieces to model during the game. If you land on an opponent's space, send their pawn back to their gear.

Step 3:

The first player to get both of their pawns to 12/12 (or one whole) for a total of 2 wholes, wins!

FEATURES:

REUSABLE AND DURABLE

Reusable dry erase materials offer repeated practice.

SKILL DIFFERENTIATION

Double-sided for practice on two skill levels!

TAKE IT FURTHER

Take it further with additional free resources, reproducibles, and downloadable content.

DISPLAY AND STORAGE

Store materials vertically for a space saver. Book-shaped box fits shelves taller than 12".
