## WORK EXPERIENCE

### RevivingCare — Front End Engineer

Minnesota United States SEP 2019 - PRESENT

RevivingCare has been designed to keep everything in one place - a simple agency management platform! Whether your agency provides adult day services, personal care, 245D waiver services, clinical or other non-skilled services, its user-friendly design and smart automations streamline your daily process through technology.

#### Key Responsibilities

- Strong understanding of building web apps from scratch.
- Collaborating with frontend developers working in different teams and delivering various products.
- Maintaining and developing new features using Angular, TypeScript, React.js with hooks, Redux, Ionic and using concepts like micro-frontends and PWAs.
- Countless improvements to code quality and performance, developer satisfaction, documentation.
- Helping our recruiters with the hiring process for our junior frontend position. My tasks included CV reviews, technical interviews, task reviews and final video or face to face interviews.

Technologies: *Node.js, mongoose db, Angular 12, Bootstrap 4, PWA, Ionic 4, Socket.io*

### MobInspire — Front End Engineer

Leading software house in Pakistan OCT 2017 - SEP 2019

#### Key Responsibilities

- Strong understanding of building web apps from scratch.
- Optimize application for maximum speed and scalability.
- Creating visually appealing web pages or interfaces using (HTML 5 / CSS 3 / Sass / Bootstrap / Foundation / Semantic UI / Angular Material Design).
- Modify current code according to client requirements.
- Migrated application from the Old static structure to advanced Angular 2 Front end Structure.
- Testing cross-browser, cross-platform, and/or cross-device compatibility for inconsistencies.

Technologies: *Angular 4/6, Bootstrap 4, PWA, Google Maps, Live tracking, Angular Material Design, Socket.io*
