

# COMPACT On-Site Oxygen Generation

## Key features :

- Plug & play oxygen generator
- Compact, mobile and silent
- Medical oxygen, 93%
- 20 l / min flow at 3.8 bar
- Integrated feed air unit
- Integrated PSA columns
- Integrated oxygen analyzer
- Fully automatic
- Medical Device CE class IIb

## Designed for :

- Small healthcare facilities
- Facilities with no piping system
- Anesthesia and recovery ventilators
- Oxygen cylinders filling at 150 bar for capacities of 5 to 20 liters (with ADDED cylinder filling systems)

# SAVE TIME AND MONEY

## Applications:

- Hospitals and Clinics
- Health Centers
- Laboratories
- Veterinary Clinics
- Army Health Services
- Disaster Areas

**Self-  
Sufficient  
and  
Reliable  
24/7/365**

Medical Oxygen supply systems across the US and overseas the industry is changing and evolving to address the growing concern over the effectiveness and reliability of the Oxygen supply chain in its current format as well as the a growing lack of availability of supply as we are seeing a serious deficiency of supply worldwide.

### Effectively Eliminate Cost of:

- Rental of the Storage Equipment (both HP cylinders or Bulk storage tanks)
- Delivery charge for supplying either HP Oxygen cylinders or Liquid Oxygen in bulk storage (fuel and environmental surcharges may apply)
- Per cubic meter of Oxygen delivered and used
