

# THINK. MODEL. LEARN.™ MATH CENTERS: COMPARING NUMBERS ACTIVITY GUIDE

## PRODUCT INCLUDES:

1 Activity Guide

1 Storage Box

1 Instruction Tent

3 Activity Mats

132 Cards

4 Game Pawns

8 Game Sliders

### PURPOSE:

Empower children to independently practice comparing numbers! This center is standards aligned for grades K-1 and geared for skill differentiation – it is double-sided for practice on two skill levels: comparing written numerals 0-10 and comparing written numerals 10-20. Students also build number recognition and number sense as they find numbers on a timeline. This hands-on, engaging center is sure to make skill-building fun as students think, model, and learn!

### SET UP:

Each activity mat will accommodate two students. Three activity mats are provided for up to six students total.

1. Attach two different colored sliders to each activity mat.
2. Choose the card set that matches the skill level of the mat for play by matching the border color. Place the card set face down on the Draw space.
3. Place one single pawn on Start. This pawn will be shared and moved by both players.

We recommend explaining instructions to students before independent play. Place the tent where students can see it for instruction reminders and visuals during use.

### HOW TO USE:

**Step 1:** Choose a pawn to share. Place the pawn on Start and the cards on Draw.

**Step 2:** Both players draw a card. Move the sliders to the numbers shown. The player with the greater number moves the pawn one space toward their star.

**Step 3:** The first player to reach their star wins the game.

## FEATURES:

### REUSABLE AND DURABLE

Reusable dry erase materials offer repeated practice.

### SKILL DIFFERENTIATION

Double-sided for practice on two skill levels!

### TAKE IT FURTHER

Take it further with additional free resources, reproducibles, and downloadable content.

### DISPLAY AND STORAGE

Store materials vertically for a space saver. Book-shaped box fits shelves taller than 12".
