

Lithium Battery

Storage & Handling:

- Use caution for shipments stored at height to prevent fall damage
- Segregate battery shipment as much as possible
- Keep batteries at room temp between 40° - 80° F
- Do not expose batteries to direct sunlight or heat for extended periods
- Avoid excessively hot surfaces and humid conditions

Emergency Response:

- Follow local emergency procedures
- Evacuate the area and notify emergency response in the event of a battery fire or spill
