

EL SALVADOR

LANGUAGE: SPANISH

THE WORK

In 2023, the estimated population is 6.5 million, which is a very large population in comparison to the land mass that makes up El Salvador. The UPC of El Salvador is a nationalized work. This means the ministerial body elects its officials. They have been without a resident missionary for several years but are requesting someone to come. It is, and has been, a revival country. As of 2023, there are 178,025 constituents, 606 ministers, and 980 churches and preaching points.

BIBLE SCHOOL

El Salvador currently has 19 Bible Schools functioning throughout the country with over 200 students. There is a beautiful Bible School and headquarters facility in the capital city area. Though the Bible School has flourished, it is a place where a missionary can make a national impact.

MINISTRY OPPORTUNITIES

The ministry opportunities are limitless with all the Bible Schools and churches. There is a need for people who can help with the evangelism efforts and coordinate seminars for further training and development of ministers. In El Salvador, there are great national leaders who have a great vision for continued revival.
