WHAT PEOPLE

Thrive sets you up with a mentor that you can talk to for just about anything. Since they are older and farther in life, they give great advice and encourage you. Plus it's great to see them every week!

SY, College Freshman, UCLA

My favorite part of thrive is having people that can support me through the college application process weekly!

AM, 11th grader, San Jose

ARE SAYING

My favorite part of thrive is The support, kindness, and fun times with the group. I love my mentors so much!! They're so open and real.

RM, 10th grader, San Diego

I absolutely loved my mentors and the support that they provided! I could tell that they were invested in the time that we spent together, and helped me out a LOT with many, many things. I looked forward to being with them, and learned a bunch from them as well.

NG, College Freshman, Harvard

MEET OUR MENTORS

Being a part of a community & having mentors are the keys to every person's success. If you're a HS student, whether a senior or a freshman, we want to offer AYM Thrive to you! Navigating life, from college apps to answering big life questions is tough so don't do it alone. Let's thrive together.

CHRIS LE

Business Administration & Computer Science
Product Manager at NestEgg

Chris loves entrepreneurship and startups and has been in the startup space for over 7 years. He played basketball and volleyball in high school and has been a mentor to youth and college students for 5 years. Chris enjoys making his own coffee and nerding out on sports and the latest tech.

ANNA LE

English
Technical Writer at Google

Anna is an English major with Computer Science experience, and is now working as a technical writer at Google. She has a passion for literature and learning, and has been mentoring HS students for the past two years. On the weekends you can find Anna shooting Weddings, graduation photos, and family portraits.

SERENA KIM

Psychology
Digital Marketing Specialist at Bariatric Centers of America

Serena graduated in 2020 and now works at a health start up, managing nine social media accounts. She has marketing experience in the education, non-profit, civil engineering, and publication industries and can provide tips to grow your accounts (jk). You can usually find Serena drinking a cold brew and reading at a cafe!

JOY YI

Statistics and Data Science
Intern

Joy recently interned as a Digital Marketing and Data Analyst Intern, streamlining \$1 million budgeting processes. However, her real passion is history and enjoys reading about European History and conversing about the Cold War. She loves doing hot yoga and baking cakes and tarts. Hit her up if you're in the area and want to check out cute cafes and brunch spots together!

WINSTON LAU

Computer Science
Intern

Winston loves teaching and has taught people ranging from fourth grade to college freshman in subjects like English and Computer Science. He played golf in high school and can also teach golf fundamentals. He enjoys playing sports like table tennis, badminton, and tennis and frequently bursts out into Disney songs.
