ICT CONSULTING

We understand what it takes to put the right technology in place to ensure maximum return on your investment. Allow **AMBICA** to help you with a holistic overview. We provide the following ICT consulting services;

1. ICT NEEDS AND RISK ASSESSMENT FOR ORGANIZATIONS

Plan your business ICT systems with **AMBICA**.

We offer systematic analysis of your business' Information and communication technology needs. We look at what technology, systems and processes you currently have and use, and what you might need in the future to support your business objectives and growth.

4.

2. ICT PROJECT MANAGEMENT FOR ORGANIZATIONS

We assist organizations in planning, organizing and delineating responsibility for the completion of an organizations' specific information and communication technology (ICT) goals.

3. ICT STRATEGIES

We assist organizations in developing road-maps that align business priorities to ICT needs. This allows your organization to carefully plan for the long term and evaluate your ICT needs and priorities before making an investment.

ICT MANAGED INFRASTRUCTURE

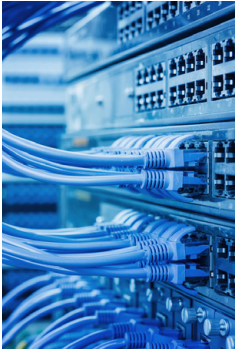

5.

Managed Services let you offload specific IT operations to us. AMBICA assumes ongoing responsibility for monitoring, managing and/or problem resolution for select IT systems and functions on your behalf plus offers remote support.

Whether you responsible for building your ICT Environment or if it's already up and running we can take over part or all of the daily ICT operations and management, leaving your team to concentrate on your valuable business objectives.

AMBICA's extensive range of Managed ICT services provides you with the perfect blend of on-site and remote managed services that result in reduced operational costs & enhanced performance.
