

UPPER WEST SIDE

Upper West side apartments for sale offer many choices for living in pre-war buildings with elaborate lobbies and architectural details in every apartment such as crown moldings, beamed ceilings, hardwood floors and the solid construction sought for its sound attenuating properties. For the most part, these buildings tend to be co-ops which are ideally suited to anyone looking to call their apartment home for the next five to seven years.

There is also a wide selection of Upper West Side condos for sale thanks to all the new development construction over the past couple of decades. For those who are seeking a boutique living experience, non-doorman buildings with fewer than forty apartments can be found especially along the blocks between Central Park West and Columbus or West of Broadway.
