LOP - GSE OUT OF SERVICE PROCEDURES

It is a requirement for the ramp/warehouse to create local procedures for reporting, locking and tagging out of service ground support equipment. The process must ensure that unserviceable equipment does not return to service until the deficiency is corrected.

Describe the following when GSE becomes unserviceable:

- What are the steps taken and who to notify of equipment that is not serviceable?
- How is GSE rendered immobile (Locked Out)?
- Where are the tags and who is responsible for tagging the equipment out of service?
- Who can return the GSE to service?

- During the daily equipment check, if any GSE is found not serviceable, a red tag is applied to damaged equipment notifying all staff damage equipment has been placed out of service. Damaged equipment is separated from daily operation, to help ensure GSE is accessible to our Maintenance Team.
- Email Communication must immediately follow to our **GSE Managers**: jrecinos@wfs.aero (GSE General Manager) and sergio.avilez@wfs.aero (GSE Assistant Support Manager) describing the observation.
- Red Tags are available in the Supervisor on Duty (SOD) office, however, a damaged equipment may be staged at the GSE shop located here at 213 with a note and follow up email to Jose Recinos or Sergio Avilez.
- Lead/Supervisor or Manager GSE Equipment was reported to is responsible to red tag equipment Immediately.
- Only Under GSE approval may equipment be returned back to service.

Local Operating Procedure (LOP)
