

Visualise the access readiness

Upgrade for Shuttle XP with shutter doors

 **Tray still moving** 

 **Tray in position** 

With Kardex's new product "Access Ready" the operator receives a visual indication that the unit is ready for operation. The green light clearly indicates that the access opening is ready for picking or the putting away of stock. This leads to improved efficiency of your Shuttle XP by reducing unnecessary waiting times.

In addition, "Access Ready" reduces the risk of user-related errors caused by the interruption of the safety photocells (lightbarrier) whilst they are active. Reducing the risk of unnecessary interruptions again leads to increased productivity as "Access Ready" stops the operator trying to access the unit whilst the tray is still moving. This application has been designed as an upgrade for all Shuttle XP models fitted with shutter doors.

Installation time: 4 – 6 hours

Innovation:

- Visual guide
- Prompt process confirmation
- Enhanced operator environment
- Controlled access to the tray

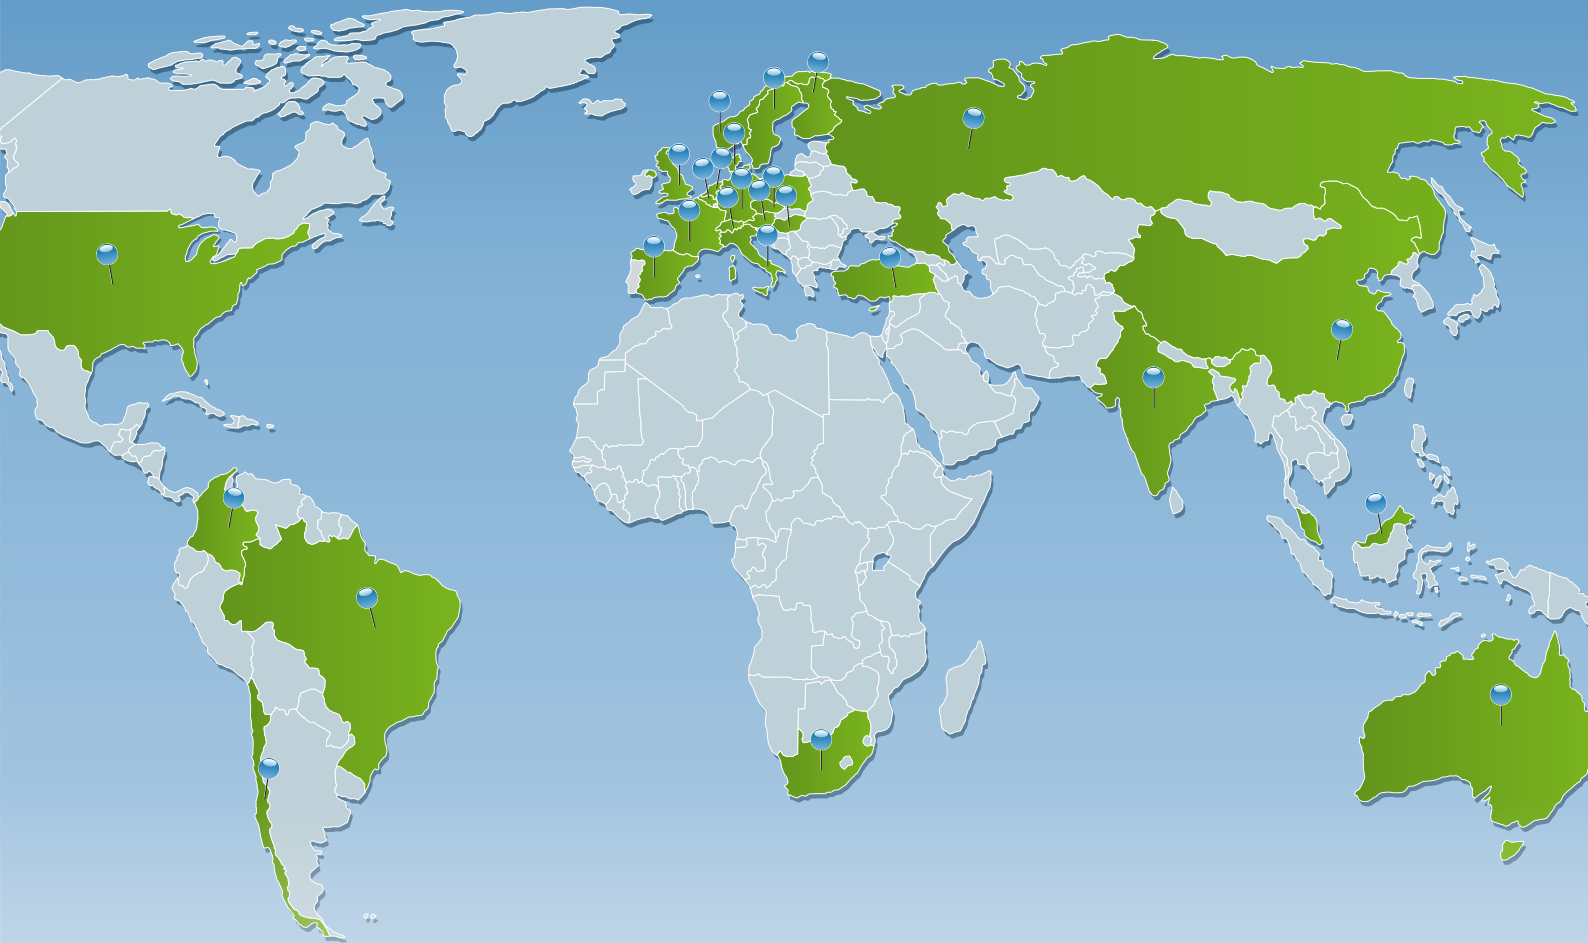

Benefit:

- + Improved pick and put-away
- + Improved security of the goods
- + Increased safety
- + Improved picking performance leads to less repair costs and increased lifetime
