

Christopher Lopez Torres  
Founder  
Lopez Services  
Cayey, Puerto Rico

## **Proposal Summary**

Lopez Services will provide electrical projects knowledge estimation to facilitate the bidding phase for small and construction companies.

## **Business Description**

Lopez Services will facilitate the estimating process by giving the customer a full report of inclusion and exclusion. Will, also provide the supplier & subcontractor quotation in a report for the use of the customer to be prepared for the bidding date and data base. For the estimate cost will provide an excel with the full detail per unit cost of the project estimated. The tool that Lopez Services will use to estimate is "Stack", also giving to the customer a full report of the takeoff worked on the project. The projects that will be estimating are electrical solar, industrial, residential and highway projects. The customer only needs to be in contact with the estimator for the delivery of request of information & date of the closing of the proposal. At the end of the estimate the customer will have a folder with all the information explained.

## **Vision**

To make a quick, reliable, and precise estimate for the customers.

## **Target Audience**

Users of this service will be mostly for the small companies or companies involved in deve the construction at Puerto Rico.

## **Goal**

Simplifying the estimating process for the companies that are involved in the construction. Besides estimating, Lopez Services wants to grow into a world of engineering services for the benefit of the small business and construction development.

## **Cost Model**

Lopez Services charged will be discuss directly with the estimator.
